

Moths Treatment

Before your pest controller arrives to treat your room for moths, please follow these steps

- **Remove all furniture and clothing:** Move wardrobes, beds, and chest drawers away from the walls. Remove all clothing, including curtains, rugs, and bedding.
- **Wash and dry clothing:** Wash all clothing in hot water and dry them thoroughly before storing them in airtight containers.
- **Empty closets and drawers:** Remove all items from closets and drawers, including clothing, books, and papers.
- **Vacuum thoroughly:** Vacuum all surfaces, including carpets, floors, and furniture.
- **Dust all surfaces:** Dust all surfaces to remove any moth eggs or larvae.
- **Clean hard surfaces:** Wipe down hard surfaces with a disinfectant cleaner.
- **Leave the room empty:** Once the room is prepared, leave it empty until the pest controller has finished the treatment.

By following these steps, you can help ensure a successful moth treatment and prevent future infestations.
